I will renew my recommendations of my last year's report in regard to building a new fire headquarters so as to enable me to place the new fire engines in the main or business part of the city, and also to remodeling the different fire houses.

In conclusion I wish to return my sincere thanks to His Honor, the Mayor, and to the members of the Board of Public Safety for the many courtesies extended and the able manner in which you have conducted the affairs of this department.

To the members of the department I also extend my thanks for the prompt and faithful manner in which they have responded to calls and the willingness which they have shown while laboring in behalf of those who look to them for protection, for I feel that the gratifying success of the past year is owing chiefly to their valorous and efficient work. I desire to thank the city officers and members of the Police Department for their excellent work at fires and for the kindness they have shown me at all times.

To my Assistant Chiefs and Superintendent of Fire Alarm, Messrs. Shuster, Caughlin and Bledsoe, I desire to return thanks for their every day assistance.

JOHN KENNEDY,
Chief Fire Department.
